Google Analytics

PROFESSIONAL EXPERIENCE

IEEE - Educational Activities - Student & Academic Programs

Technical Solutions Specialist

August 2026 - Present

- Advanced an intern-developed TRYEngineering Games revamp by implementing search functionality and a scalable content taxonomy. **Impact:** Improved navigation, resource discovery, and long-term content organization.

Temporary Program Support Specialist

February 2026 - August 2026

- Supported global TRYEngineering and EPICS in IEEE operations through project coordination, stakeholder communications, content management, data analysis, reporting, and process improvement.
- Maintained and improved TRYEngineering WordPress content using SEO, accessibility, taxonomy, and governance best practices. **Impact:** Reduced website quality review time from ~30 minutes to 3 minutes and improved content consistency and maintainability.
- Built automation, AI-assisted workflows, reporting tools, and reusable documentation to streamline content development and program operations across IEEE Educational Activities. **Impact:** Increased spotlight article production from 2 to 6 per day, reduced proposal data extraction from ~45 to 15 minutes, supported 500+ communications and 7-8 projects, and created 6 reusable training/process resources.

Volunteers of America - Greater New York

Peer Specialist

November 2025 - August 2026

- Coordinated participant services within a nonprofit supportive housing program, serving as a liaison among residents, healthcare providers, community partners, and staff to resolve issues and support daily operations.
- Led weekly groups, tutoring, and technology-assisted activities while providing training and support for email, patient portals, school platforms, mobile apps, and other digital tools. **Impact:** Increased digital literacy, academic engagement, and independent technology use among approximately 15-25 residents.
- Exercised independent judgment during emergencies and complex interpersonal situations, coordinating staff and residents, facilitating meetings, resolving conflict, and maintaining operations without formal authority. **Impact:** Earned an expanded caseload and regular operational coverage responsibilities while improving accountability and engagement across a 5-person interdisciplinary team.

Apex Remote Patient Monitoring

Systems & Support Engineer

July 2021 - October 2025

- Delivered technical support, data management, workflow guidance, and customer liaison support for a remote patient monitoring platform across clinical, IT, vendor, and business teams.
- Supported software engineering, database design, testing, troubleshooting, and system enhancements using APIs, XML, HTML, CSS, JavaScript, SQL, and PHP. Improved workflows, data models, training, usability, and accessibility. **Impact:** Reduced repeated support requests by 50%, improved UI/UX by 93%, and increased adoption of new workflows and platform updates.
- Improved relational database quality through SQL validation, error identification, and Python automation. **Impact:** Reduced data quality issues by 40%, improving reporting accuracy and supporting risk management.
- Automated reporting and developed dashboards to support financial tracking, KPIs, operational analysis, and decision-making. **Impact:** Improved reporting visibility and operational efficiency across a 12-clinic healthcare system.
